7. Which aspects of the course were most valuable?

The labs and in class discussion/activities were valuable in helping to better understand the subject. I particularly liked the "game show" type activities where we all participated using "clickers" to interact with questions shown via projector. Professor Rai would always follow up each question with an explanation of the answer as well.

All the examples.

The in class lab helped us as students use the information from the lecture so we can better understand the material for the tests.

The labs are awesome!

8. The instructor stresses important points in lectures/discussions.

17. What did you find most valuable and helpful about the instructor?

Professor Rai's enthusiasm was very important. He is genuinely excited to teach students and has done an excellent job in his first semester here. It is of my opinion that an enthusiastic teacher who engages students will see greater results than those who recite purely from books.

He wants us to succeed

He really tried to make us understand the lecture, by having us answer questions in his slide show to see if we understood what he was trying to teach us.

He is passionate about what he teaches.

18. My overall evaluation of this instructor is....									
Great instructor! Professor Rai, your beliefs of what the class should be like for students is spot on. When we first started the semester, your belief that the course shouldn't be purely lectures and labs were correct. By you mixing in other classroom activities like the clicker interaction, you made the classroom more diverse and interesting. Variety greatly helped keep me on track with the course.									
A									
He is a good teacher, well informed in his field of Physics and knows of ways to help us as students better understand what we need to know in order to better ourselves.									
He is great!

28. State in two or three sentences how this course could be improved.

There were times when Professor Rai would have liked to demonstrate certain experiments, but was unable to since the equipment to do so wasn't available. As long as Professor Rai continues the way he has this past semester, I can only see the class improving more.

Perhaps he needs to make sure the students really understand the labs, instead of giving half the class the time to do the lab make a whole day to do the lab. I know for a fact that some of the labs felt a little scrunched when they were assigned and having hem done again after a different lecture felt like we were confused during the lab time.

It needs a little more organization.

29. Other comments:

Thank you, Professor Rai. I'm positive a lot of other students will appreciate you being their Physics instructor. Keep up the enthusiasm, positivity, and good work. Also, you're a really good sport when experiments went slightly awry. "Science failed us this time." Loved it. Your grading structure is excellent for those willing to put in the work as well. Best of luck to you!
