5. Which aspects of the course were most valuable?									
The most valuable aspects were the lecture parts of the class, where he would explain problems and theories.									
Dr. Rai is wonderfully kind and enthusiastic and knowledgeable. He does an excellent job introducing the context and importance of each new concept. He really cares that we understand the "why" behind what we're learning. He is a really good lecturer. Also, he is always well prepared and has the lesson outlined for us. He breaks it up nicely with lots of demonstrations.									
Class and lab activities									
The most valuable was the RC circuit as it can be applied in real life situations.									
I enjoy Buddhi's physics demonstrations.									
The problems and lectures

12. My overall evaluation of this instructor is....									
He is a very enthusiastic teacher, and I love that he really tries to engage us! He really has a passion and I really appreciate that.									
He is absolutely fantastic as a human and lecturer.									
Very good									
He's an awesome teacher. Physics is difficult but he always tries his best to make the lectures as manageable for each students. He will find ways to get his students participating in class.									
Dr. Rai is very knowledgeable and enthusiastic about physics and makes class enjoyable.									
Excellent, enthusiastic!

19. State in two or three sentences how this course could be improved.

This course could be improved by having a short test-prep session before each test, emphasizing what key content will be needed.

Lab handouts could be shorter, sometimes the labs are a bit long/repetitive.
The first exam was too long but then Dr. Rai took the feedback and made the following exams the perfect length.
Dr. Rai could consider bringing students up to the board to solve problems once in awhile.

None

Power points of the lectures

Maybe use powerpoints more.

Class problems could be slightly more structured. Sometimes we could have moved through simpler concepts more quickly so we could have more time for difficult concepts.
