5. Which aspects of the course were most valuable?

In class problem examples.
 They help enforce material and further knowledge.

Labs and going over drill questions and problems.

The important aspect of the course is that everything build on one another and that they start to relate with other classes.

applying math into real world application

Lectures.

6. The instructor stresses important points in lectures/discussions.

12. My overall evaluation of this instructor is....									
Excellent professional knowledgeable kind									
A great instruction. Enthusiastic and energetic about the subject and while teaching it.									
Professor Rai really likes to make sure that everyone in class is on the same page. If possible, he really likes to stick with the math for the class but does get into the difficult calculus part of the class if necessary.									
Great class									
He is a amazing instructor.

19. State in two or three sentences how this course could be improved.

N/a

Felt that labs could be more interesting.

The assigned homework can be better assigned by having more but less problems instead of having a big assignment with a multitude of problems that needs to be answered together.

motivated class

Labs spread out now through out the course.

20. Other comments:

Had fun learned a lot.

Thanks

Great class
